SCIENCE

1) Working Model on 'Respiratory System':

Materials:

- 2 small balloons (to represent lungs)
- 1 large balloon (to represent the diaphragm)
- Transparent plastic bottle (cut in half, to represent the chest cavity)
- Straw (to represent the trachea)
- Rubber bands or tape
- Scissors

Procedure:

1. Prepare the chest cavity:

- Take a clear plastic bottle and cut off the bottom. This bottle represents the chest cavity.

2. Prepare the lungs:

- Take 2 small balloons and attach them to the two ends of a "Y-shaped" straw. The straw represents the trachea branching into bronchi.
- Make sure the balloons are tightly fitted and airtight.

3. Attach the diaphragm:

- Stretch the large balloon over the open bottom of the bottle. This balloon represents the diaphragm.
- Secure it tightly with a rubber band so that it doesn't leak air.

4. Assemble the model:

- Insert the Y-shaped straw with the balloons into the neck of the bottle.
- The small balloons (lungs) should hang freely inside the bottle.

5. Demonstrate breathing:

- Pull the large balloon (diaphragm) downward. The small balloons (lungs) inflate.
- Push the diaphragm balloon upward. The small balloons deflate.
